Subject: California Proposition 65 Compliance Statement

Dear Valued Customer,

California's Proposition 65, also called the Safe Drinking Water and Toxic Enforcement Act of 1986 is a right to know California law that was set out to promote clean drinking water and inform the public about the presence of toxic substances, so that Californians are able to make informed decisions to protect themselves from chemicals known to cause cancer, birth defects, or other reproductive harm.

Bob Martin Company is a manufacturer and distributor of wire and cut length products that include Nickel and cobalt based alloys as well as stainless steel grades. The products we process do contain chemicals on the list such as Nickel, Chromium, Beryllium, Cobalt and Molybdenum; however, no substances on the CA Prop 65 list are intentionally added. This statement serves as notification of the presence of these chemicals. We have also chosen to issue this warning on all of our products as an act of caution and because our customers have the right to know.

We are committed to providing high quality raw materials to our customers. We will continually work with our customers and suppliers to comply with all product safety and environmental requirements that apply to our products.

Sincerely,

Miriam Madrid
Quality Manager
